The Nugget Is California's Leading Mining Weekly

Nevada City Nugget

VOLUME VI NUMBER 40 | The GOLD Center | NEVADA CITY, CALIFORNIA | The County Seat Paper | FRIDAY, AUGUST 12, 1932

TOM COAN HITS ORE ON HUSSEY

Last Saturday evening just as we were about to close Tom Coan came in with a rock almost as large as himself for our display window.

The rock which is heavily mineralized sulphide ore attracted attention the minute it reacher the office and it is still drawing fair sized groups of two or three almost constantly.

Mr. Coan has spent several months in Willow Valley east of Nevada City developing the likely looking ledge in the Hussey mine.

Last Saturday he was rewarded for his hard work with this rich mineralized flotation ore that assays $50 a ton in gold values.

The tunnel is in 150 feet and he has drifted 20 feet on the vein which is two feet wide at this time and indications are that it will widen as the vein goes down.

The formation is the same at the Murchie mine which has proven a big producer. The vein runs parallel to the Murchie mine veins and is one half mile north of the Murchie ground.

In talking of mining Mr. Coan said, "The only way to mine is to get into the collar and work. Mines are not found by sitting around and looking wise like an owl, not many mines were ever found by these would-be experts."

The Nugget congratulates Tom on his successful find and agrees with him in the above conclusion. No matter what comes or what goes Tom Coan always has a ready smile and ready laugh, and is willing to lend a helping hand on every occasion. He has always been one of our good friends and staunch supporters and we are glad he did not forget The Nugget in his victory.

GOOD PROGRESS BEING MADE AT BOSS MINE

There are about nine men employed at the Boss mine near North San Juan doing extensive development work.

The old shaft is down about 450 feet, but has not been opened up by the new company. They are drifting on good ore down a short distance in the shaft.

Electricity was cut into the mine a few months ago and new electrically driven machinery has been installed

Charles J. Lyser is superintendent of the property which is owned by the Bradley interests.

BRUSH CREEK MINE HAS CREW MEN WORKING

The 10 stamp mill at the Brush Creek mine is running regular day shift at this time, the night crew having been laid off last week.

There is a tunnel in the mountain about 1700 feet and at present the company is working on ore taken from a winze on the No. 4 level.

About 40 tons of ore is being milled each day and giving satisfactory returns.

The mine is located on the serpentine and quartz formation, that is noted in that section as producing heavy yields in gold.

Twenty-two men worked at this mine all winter and at present there are about twenty-five employed.

Ben F. Ballard of near Santa Rosa is general manager at the mine while Bob Duncan is superintendent.

SENATOR J. M. INMAN TO OPEN THE GLEN MINE

It is reported that Senator J. M. Inman of Sacramento of June 1 took over his Glen mine, near Last Chance in Placer county, from leasers, and will develop the mine himself. It is a gravel mine with good production records. About eight men are at work at the mine at present and as development progresses more men will be added.

PLACER COUNTY MINES

The Pyramid mine, in the Rescue district, has recently opened a rich ore body on the 700-foot level.

Charles Croft recently bonded his mine near Comnio to J. S. Green and associates, of Los Angeles.

The Wiedebush mine is working regularly with 10 men employed and the Ruby Consolidated has three men at work.

MINING EXCHANG SENDS COMPLIMENTS TO NUGGET

Dear Mrs. Willoughby:—

As the San Francisco Mining Exchange and the Nevada City Nugget are striving toward the same end—the betterment and welfare of the mining industry—we wish to compliment you upon your excellent work in connection with the publication of The Nugget. The columns of your newspaper undoubtedly have been a medium of much benefit to the mining industry.

In the attempt to attract attention to mining and probably bring new capital into the industry, the San Francisco Mining Exchange is making a callection of ore samples which are prominently displayed in the Exchange lobby with descriptions of the specimens and the names of the districts and properties concerning articles in our exhibit which may lead to actual business dealings.

We desire to obtain all the samples possible from the mines of Nevada county and hope it is not asking too much to have you make known our wishes through the columns of your paper.

Assuring you of all possible support we may be able to give The Nugget and thanking you for past favors, we are,

Very truly yours,
CHARLES E. HUDSON, President,
San Francisco Mining Exchange.

MISS HELEN GRAHAM PASSES TO BEYOND

The death of Miss Helen Graham of Selby Flat in the last week came as a great shock to her many friends.

A nervous breakdown had caused her several months of illness but it was not felt that she was so gravely ill.

After graduating from local schools she spent twelve years at business college and employed in clerical work in St. Helena.

She has led an industrious and useful life and was loved and highly esteemed by all who knew her.

The following sisters and brothers are left to mourn her passing, James S. Graham of Stockton; Charles and William Graham of Nevada City, and the Misses Bertha and Alice Graham of Nevada City.

The funeral was held from the Holmes Funeral Home Tuesday with Rev. Schaffner of Sacramento officiating.

Foots Crossing Road To Alleghany Beautiful Drive

America's most spectacular mile of mountain road commences a few hundred feet after the stage route commences, to dip down into the canyon of the Middle Fork of the Yuba river on the Footes Crossing road en route to Alleghany. Up to this point it has been winding through a densly forested region among tall pines and brilliant green shrubbery. The trees, dozens of varieties, now commence to drop back and a few short glimpses of the vast canyon is obtained. A little further a mailbox stands along side the road. From this point, supplies and equipment are skidded down the sheer mountain side clear to the stream at the bottom of the canyon, where a group of men are mining for gold on the absolute bedrock, which in places is 30 to 40 feet below the present bottom of the river. Away below can be seen the horse shoe bend of the North Yuba underneath which this mining is now in progress

Proceeding slowly so that full advantage might be taken of the scenic spectacle the road is noticed now to have on its outer edge a stone wall; and the steeply sloping canyon walls above become rocky and perpendicular. As the next point is rounded the turn of the road ahead can be seen, heavy rock walls clinging to the very face of a precipice. The road bed is amply wide for two cars but still the motorist drives slowly. It is one road for which every driver has a wholesome respect. Just after rounding the second point the car should be stopped so that the full impressiveness of this marvel of engineering can be appreciated. On the upper side is the moss covered perpendicular rock extending upwards hundreds of feet. To the left is the rock wall dropping straight for more than thirty feet, its bottom resting upon the headlong downward continuation of this awesome precipice.

Below a wooden flume can be seen and far below it the dwarfed looking trees that stand at the shore of the river itself. The flume looks to be almost at your feet, as though a rock might easily be tossed over—but it takes a very apt thrower to hurl one over. The walls dipping in and out of the niches along this precipitious face, were built many years ago by artisans of the highest order. They are of the type known as dry masonry and so perfectly matched and carefully laid that after decades of winter storms, soaking water and swelling ice, they remain in perfect condition. In places the canyon is so straight, up and down, that large iron bars are attached along the outside of the walls and anchored through the fill of the roadway itself far into the solid rock. Whosoever stands on this stupendous piece of road construction, looking up the towering walls on one side and down the abysmal drop on the other cannot but feel his insignificance.

The mile of this road which is truly a high way continues to carry the motorist down towards the Footes Crossing bridge at the bottom of the canyon. Soon the bridge is visible. Ahead and below rise the canyon walls half a mile above the stream while in the middle of the canyon itself is reared up a mountain, dividing the great canyon into two mighty canyons, that of the Middle Fork of the Yuba river to the right, and of Kanaka creek to the left.

The bridge, where a road house once gave shelter to man and beast and where today numbers of tents of those who are panning the river for gold, carries the road to the North side. Four switch backs quickly lift the motorist high above the canyon floor and start him on the three mile climb to the upper and northern edge of the terrific gorge. At every foot of the climb new vistas of scenic granduer unfold, until at the top one looks down upon the mountain in the center and finds it shrunk to scarcely more than a dividing bar, to bi-sect the great canyon of the Middle Fork of the Yuba river.

EDITORIAL . . . . . .

The Editor of The Nugget upon returning to her desk, wishes to express her pleasure in the fact that our friend Judge George L. Jones is a candidate for Superior Judge at the ensuing election.

His record in the matter of appeals from decisions by him was such as to qualify him as one of the leading trial judges in the State.

Judge Jones enjoyed a long and honorable career upon the bench and as District Attorney of Nevada County.

As a civic leader he has been distinguished for somany years in anything that stood for progress and for humanity that The Nugget feels that it cannot let his candidacy pass without this comment.

The writer is proud of the fact Hugh L. Preston, Jr. Presiding Justice of the Third District Court of Appeal comes from her home county—Mendocino. During his term of office as Superior Judge of Mendocino county he gained a reputation for his judicial ability.

Aside from Judge Preston's undeniable judicial qualifications and the fact that he has proven himself capable to act as presiding justice of the Appelate Court, there is another reason for his retention that appeals strongly to the feeling of fairness that is an outstanding trait of American people. Judge Preston was asked to fill the remainder of the late Judge Finch's term.

In less than one year's time he has demonstrated that he is the right man in the right place and it would only be an act of fairness on the part of the voters of the Third Appelate District to return him to office.

Judge Preston's character, judicial ability, fairness, honesty and conduct in office has been beyond reproach, There is not a single valid reason exists why Judge Preston should not be retained in office.

Sacramento is jealous of Judge Preston's appointment to the Appelate Court because it is the first time in twenty-five years that she has not had a representative in that court. Just why Sacramento should feel that she has a superior right over the other 34 counties comprising the third district we do not know.

We do know,however, that the mountain counties should vote as a solid unit to retain Judge Preston as presiding justice of the Third District Court of Appeal.

Nevada County can be justly proud of the fact that she has had men on the superior bench of the county of such fine qualities as to attract state wide attention. Both Judge Tuttle and Ex-Judge Jones have served many times on the appelate court being chosen from a small county on their own merits entirely. Judge Preston on the occasion of his visit here earlier this week spoke very highly of both the judges.

Another candidate who should be returned is Senator Shortridge.The Senator is proud of the fact that he once worked in a mine near Nevada City. He has always been more than friendly to the mining interests in any legislation of that nature. But if for no other reason Senator Shortridge should be given the vote of approval by the people of California for his work on the tariff bill which virtually saved the state of California. He is highly regarded by the other members of the Senate. It would take anyone else years to gain the position of Senator Shortridge. regardless of their qualifications. Therefore California would make a big mistake during these critical times to attempt to send anyone else to the United States Senate in the place of Samuel M. Shortridge.

The Nugget congratulates two of her favorite candidates, Congressman Harry L. Englebright and J. L. ("Jerry") Sewell, candidate for State Senator on the fact that they are unopposed at this time when running for office which seems a favorite indoor sport. Both of these men have proven their ability in legislation and have worked untiring for their district thereby winning the admiration and loyalty of their constitutents.

BRIGHT YEAR IS IN PROSPECT FOR SCHOOLS

The grammar and high schools of Nevada City will open Monday, August 29th. It is expected that there will be a heavier registration in each school on account of so many new families moving into Nevada City within the last few months to make their home.

Teachers in the elementary schools are:

W. A. Carlson, principal; Mrs. Kate McCormack, Miss Ruth Hogan, Miss Kate Shearer, Mrs. Mamie Warnecke, Miss Ruth Hogan, Miss Savory Ford, Miss Gertrude Goyne,

Teachers for the Nevada City high school are:

Hillman Kjorlie, principal, Beverly Baron, Mrs. Eva Flewellen, Miss Alice M. Carter, Miss Harriet Fischer, Miss Mabel Stevens, Miss Esther Tremaine.

Mr. Leslie Sweeney will teach music in both the grammar and high schools.

John McCarthy of Pasadena, a former Chicago business man, who two years ago purchased the Rueblin quartz mine near Last Chance in Placer county from D. M. Ray.

McCarthy engaged Mr. Ray to do development work and he has lengthened the tunnel below the original tunnel, which was fairly well worked out in the early days. Other development work is to start at once.

In the meantime McCarthy had engaged Mr. Ray to do development work and as a result a tunnel has been lengthened below the original tunnel, which was fairly well worked out in the early days. Other development will be accomplished immediately.

PLACER COUNTY MINES

A most interesting barometer of the industry generally is seen in the reports of purchases by local gold-buyers. One Placerville source said the value of his gold purchases is twice what it was a year ago. Most of this gold is bought from prospectors, who bring it in in lots of from $1 to $6 or $10, the average value of the purchases being $3.

Perhaps the outstanding transaction in recent months in the county is the report of the sale of the Landecker mine by Dick Reynolds and Tom Gerle to a Texas syndicate headed by Senator T. S. Hogan, of Midland, Texas. The deal, at this writing, had not been closed. The prospects at the mine have been so encouraging to Senator Hogan that he has had an engineer here for some time making a survey of the property. A deposit indicating good faith has been posted and it is presumed Senator Hogan is awaiting the report of the engineer. If the report is satisfactory, the mine will be turned at a figure of $50,000.

Charles Dysle is working the James I. Martin mine, while the Montezuma, near Nashville, is boomin galong with 12 men employed.

The Hamburger mines have transferred the scene of their operations to just across the Amador county line.

BERT BROCKART IS NOW OPENING NEW GROUND

Bert Brockart, who has a number of mining claims near the Mountain House above Camptonville, was a Nevada City visitor this week.

He has spent two years locating a six foot ledge of good ore, first running an open cut and then running a tunnel into the mountain. He is now sinking on the vein and the ore is improving as work progresses.

Mr. Brockart has completed the assessment work for this year.

Last fall he was working in the tunnel and upon coming out at noon his house had been completely destroyed by fire. Nothing was saved and he had to go over the ridge to another cabin and get in new supplies of food and clothing for the winter.

The different claims are designated at Hill Top, Central Hill Top and West Hill Top.

A group of mining men went out with Mr. Brockart Tuesday to look at the property with a view of purchasing the ground.

DOW RANCH TO BE SUBDIVIDED

Mr. M. Ivan Dow, who owns about 90 acres of land one mile north of Nevada City on the scenic Tahoe-Ukiah highway has decided to subdivide and sell the bulk of this ranch for thebuilding of homes by our residents and anyone wishing to own a hmoe in one of the most beautiful locations in our district.

The property is registered as The Sagamore ranch. It has buildings on it has a number of splendid walnut and filbert trees near the home.

Mr. Dow owns a water right on the property, which is an important asset these days. There is also an abundance of water and electricity is to be had on the grounds.

This ranch is located in the warm thermal belt and all tender growth of vegetation lasts weeks longer up there than down in the heart of our city.

The Grass Valley-Nevada City Ski Club grounds are only about eight miles east of this property, and it is all paved Tahoe-Ukiah highway.

A number of prospective buyers have been out to view the property within the last few days and all expressed themselves as well pleased with the site.

OLD CHEYANNE SHAFT IS OPENED BY FRICOT

The old Cheyanne shaft on the Independence claim, immediately adjoining the Brunswick claim on the north and close to the road leading from Town Talk to the Brunswick, is now being opened by D. Fricot, the owner.

A crew of five men are engaged in rehabilitating the old hoisting works and renewing the foundation around the collar of the shaft.

The shaft was sunk in 1893-94 for the purpose of locating the eastern extension of the Idaho vein. It had a dip of about 70 degrees, is about 500 feet in depth and follows a fissure in the serpentine.

A small gasoline hoist has been installed for the preliminary work and the shaft has been found to be in unusually good condition considering the length of time it has been abandoned. Mr. Fricot has not announced what his plans are after unwatering has been completed.

ALPHA STORE INSTALLING SCHOOL HEATING PLANT

A conract was let by the Nevada City Board of Education to the Alpha Stores Ltd., to install two new heating furnaces in the grammar school building. Work of installing will be complete before the beginning of school.

The system of heating will be by hot air currents which are circulated through the rooms.

Last year school was dismissed on one or two occasions on acount of the poor heating system at the building.

NARROW GAUGE CUTS RATES ON CONCENTRATES

W. A. Wenneson, traffic manager of the Nevada County Narrow Gauge Railroad, has recently effected a reduction in freight rates on all concentrates moving from this territory to smelters at bay points, now making it profitable to move out low grade ore which heretofore was prohibitive on account of high transportation costs.

Various mines have taken advantage of these low rates and are shipping concentrates which have been stored at mines for many years.

This will be an important announcement to many mining men and will create more business for our railroad which we wish to assist in every way. The Nugget has always had the interest of the narrow gauge railroad in mind and feels it would be a severe blow to Nevada City and the up-country if it should discontinue business.

The narrow gauge railroad is of vital importance to business life of this district. This decision which was made by the railroad shows that they have at heart the welfare of this section and are doing all they can to further the mining industry.

HILLS FLAT IS RAPID GROWING TOWN JUST NOW

OLD TIME FIRST AND LAST CHANCE SALOONS GIVE WAY TO BUSINESS HOUSES

It's a far cry from the days of the "First Chance" and "Last Chance" saloons at the Maryland road and Nevada City highway crossroads to the self-sufficient little settlement, which bears the name of Hills Flat, but the jump was accomplished in the passing of a decade and received speed and vigor during the past year or two. The Hills Flat precinct shows the largest population gain of any precinct in the last registration.

Lying outside of the city limits of Grass Valley, but yet possessing municipal water, fuel gas, electric lights and a paved highway, Hills Flat is pursuing an existence entirely seperate from Grass Valley and according to the proud residents of that section could almost get by without dependence on the big neighbor to the west.

Self-sufficiency is shown in the services of a restaurant (Spanish Inn) at the crossroads; a public telephone booth; two grocery stores open and doing business and a third under construction, all at the crossroads; five automobile camps with tourist cabins provided with heat and water; several daries where fresh milk and cream can be secured; a furniture store, two user car lots, a garage, lumber yard and several highway fruit and vegetable stands.

More Building

Most of these business houses are new within the last two years, many within the last year and the end is not yet in sight. The Spanish Inn is building a storehouse and garage addition to face on Railroad avenue. Jack Frost, contractor, is completing a store building and apartment facing East Main street in the same section.

With the heavy increase in business property the population of the Hills Flat section has doubled, a fact that the residents never fail to comment upon in recounting the progressiveness of the settlement. More stores and living quarters are in prospect for the immediate vicinity.

May Soon Line Highway

Farther along the Nevada City highway between Hills Flat and Glenbrook additional construction is underway. The Reid ranch, Segsworth bee farm and Shaw fruit stand are older institutions, although the Shaw fruit stand completed some very attractive improvements during the recent summer.

Just over the brow of the hill and on the south side of the highway Thomas O'Reilly, proprietor of the Log Cabin Inn on the Tahoe-Ukiah highway, west of Grass Valley, is constructing a combination lunchroom, automoble court and service station. F. W. Woodend and Son, contractors and builders are in charge of the building. The main unit will include the lunchroom, service station and living accommodations for Mr. O'Reilly. The automobile court will be in horseshoe shape and follow the contour of a small creek which flows to the rear of the lot. The automobile court houses will be substantial and attractive.

On the opposite side of the highway and just across from the entrance to Lake Olympia Park, Mr. and Mrs. E. O. Thompkins a fine four room house with bath and plan to occupy the place before the winter storms. Water under pressure is obtained from the canal on the hillside to the rear of the home and electricity and gas are taken from before the residnce.

The residence is almost complete exxcept for the trim and service connections.

Mr. Thompkins is the proprietor of the Acme Body and Fender Works on Main street in Grass Valley. A second house is planned to adjoin the Thompkins home and will be occupied by Mr. and Mrs. P. C. Pupillo, son-in-law and daughter of the Thompkins'.—The Morning Union.

PLACER COUNTY MINES

The Square Deal mine, at Gold Hill, has been taken under a bond and lease by C. E. Loomis and associates and equipment to handle 20 tons a day has been installed. Values are reported as satisfactory.

NEW AUTO CAMP TO BE NORTH OF NEVADA CITY

Mr. .and Mrs. Lawrence of San Francisco have purchased 80 acres of land on the left side of the Tahoe-Ukiah highway about one mile north of Nevada City on which they will erect modern camp cottages.

They see a splendid future for this section and have started to improve the property. It is situated north of Nevada City and overlooks the town and beautiful valley surrounding it.

If present plans are carried out this should be one of the most attractive camps in the district. At present they are leveling a knoll in front of the two houses on the property where they will erect a service station and up-to-date garage. A large stock of parts and accessories will make this one of the most will be kept on hand.

A beautiful camp site to the west of the houses has been cleared leaving the pine timber. Water is to be piped to the ground and several cabins to be built soon. There is an abundance of fine mountain water.

The earth moved from the knoll was used as a fill in a ravine betwen the cabins and machine shop. A cement wall is to be constructed and a swimming pool will be handy for those at the camp.

Mr. and Mrs. Lawrence are new arrivals in our district and we wish to welcome them to our section.

BERLE THOMAS FOR SIXTH ASSEMBLY DISTRICT

Berle Thomas, Placerville, candidate for the Sixth Assembly District, of which this county is a part, has received formal notification of the endorsement of his candidacy by the Big Four Brotherhood of Railroad Workers. The endorsement, made in San Francisco, at the meeting of the Legislative Committee and representatives of the four branches of the Brotherhood, is a coveted action and carries heavily with union labor in all parts of the district.

In addition to the endorsement of the San Francisco group, the local man will, as a result, secure the active support and assistance in his campaign from the locals in various parts o fthe district. The endorsement is for the conductors', engineer's, firemen's and brakemen's organizations, and was based upon recommendations of representatives of local unions, as well as an investigation of the record of the candidate on labor questions.

Because o fthe fact that Thomas is opposed by four candidates, one of whom lives in Roseville, and had the endorsement two years ago when running for the assembly, the local candidate expressed great gratification at the action, pointing to the same as a material assistance in the campaign.

Mr. and Mrs. Ed Murchie and daughter are spending their vacation in Monterey.

STOCK AND BOND MARKET

Public interest has increased greatly in both stocks and bonds, and it was noted that there is an increase in buying from the West, where the immediate result of the commodity raise is more obviously felt. The rise of the stock market has been explained by the firming up of commodities, the better credit situation and signs of scattered industrial activity, together with impending inflation if the banks take full advantage of their privileges under the Glass-Borah amendment to the new law which would permit them 995 millions of additional paper money in the form of national bank notes. Under the home loan act nearly a billion more will be issued with only government securities as backing, not gold. Yet no reasons have been shown of a need for current circulation. The average buyer of stocks and bonds should always exercise a great deal of caution before accepting the opinions of propogandists given in the financial news of the various dailies. It takes a great deal of experience and knowlegde to interpret the general financial trend which, in our opinion, is uncertain at present. The stocks mentioned in our letter for the week ending July 30 moved into new high ground. U. S. Steel closed today at 34 3-8 against 28 7-8 last week; American Tel 100 3-8, last week 89 3-4; Southern Pacific 13 1-2, last week 12 1-2; Standard Oil of Calif. 27 1-4, last week 24 7-8; Alaska Juneau 11 last week 10 3-4.

National Dairy Net Raise Seen

National Dairy Products Corp. and subsidiaries for the six months ended June 30, 1932, report consolidated net profits of $6,969,625, after depreciation, interest, subsidiary's preferred dividends and federal taxes, equal, after National Dairy Products' preferred dividends, to $1.05 a share on 6,263,150 no par common shares. The volume of milk sales, now around 1,500,000 quarts daily, is as large as it was a year ago, although dollar volume is down materially due to lower selling prices. Volume of ice cream has been somewhat less this season than a year ago, presumably due to increased competition from various independent sources.

Not All Good News

Woolworth reported sales in July showing a heavier percentage decline than for the first seven months of the year. The drop was in excess of 13 per cet against a decline of only 9.8 per cent for seven months. However, for the time being, the market was inclined to ignore any adverse news and lay more stress adverse news and la ymore stress on the action of stocks themselves.

Gold News

A monthly production rate of over $1,000,000 has been maintained by Lake Shore mine this year, a rate to which approximately 15 per cent can be added when the change is made into Canadian dollars. The mine has had no difficulty in maintaining this production and any matreial change is likely to be upheld instead of downward. The addition of flotation and the special treatment of the concentrates has improved milling results, addig to the percentage of gold extracted. With a gold production at the rate of over $12,000,000 a year, or about $14,000,000 in Canadian funds, and costs of about $6,000,000 profits are currently at the rate of $8,000,000 a year, or $4 a share. While nothing official has been given out, it is generally believed that dividends and bonuses will continue at the rate of $3 a share per year until surplus reaches the figures desired.

"American Tropics"

An acre of bananas will produce three times as much food, by gross poundage, than an acre of wheat. The cocoanut groves of the tropics are displacing the pig as a source of fats. The bamboo of the tropics may frame houses when the northern pine is gone. The Amazon pours out to the sea every year millions of tons of ready-made paper pulp. Most of our sugar and all of our rubber come from the tropics. Coffee is from the tropics and tea extends only a little beyond them. The tropic can feed us and cloth us and house uh long after our own resources are inadequate.

NEWS IN BRIEF

SWAZEY HAS SONG PRINTED

Joe Swazey, who has been called the Nevada county song writer and poet, announces that his latest song, "That Cozy Little Cottage", was set to music by Harry Clifford of Hollywood and will be on the market in a short time. It is a fox-trot ballad and will no doubt prove popular.

The Nugget has always encouraged Joe in his writing of poetry and will be pleased to see him succeed.

First Car of Pears Shipped—

The first carload of Bartlett pears were shipped out of Nevada county last Friday. They were shipped by the Colfax Fruit Growers Assn. The fruit came from the Schwartz, Hartung and Swanson ranches of Pleasant Valley and the Clinch and Seeley ranches of Rough and Ready. Pear shipments east have been called off till the 15th to give the fruit more sugar content and with the hope of better market conditions.

Mr. and Mrs. W. H. Davey left this week for a vacation a tLake Tahoe and Yosemite Valley. They were accompanied on the trip by Mrs. Davey's uncle, William K. Runyon, of San Marino..

Errol MacBoyle, president of the Idaho- Maryland mines, left this week to attend a special meeting of the State Chamber of Commerce relative to State Compensation Insurance.

We have received another communication from Mrs. S. M. Katzer and find that they have moved from Arizona to San Bernardino county in the southern part of the state. They enjoy The Nugget and enjoy the news given of their many friends in Nevada City.

Judge Oscar Winburn of Grass Valley was a caller at The Nugget office Monday. He is planning a vacation for the month of August. No traffic cases will be held in Grass Valley courts during that time, but he expects a long calendar for September as all cases will be set over until next month.

Attorney and Mrs. Robert Searls and two daughters of San Francisco spent last week end visiting his mother, Mrs. Fred Sarls, Sr. Mr. Searls also attended the dinner in honor of J. N. Becker, mining man of South Africa, and a former Nevada City resident.

Miss Miss Margaret Rector and brother, William Rector, have returned to the bay region to reenter Mills College and University of California respectively.

William Lackland of North San Juan was a Nevada City visitor last Tuesday.

Mr. and Mrs. John B. Grenfell of Sacramento spent their vacation in Nevada City with Mr. and Mrs. Will H. Davey.

Has Leg Amputated—

Elizabeth Werry, young daughter of Mr. and Mrs. Frank Werry, has had one leg amputated above the knee as an infection had entered the bone. Mr. and Mrs. Werry were former Nevada City residents and have many friends here who will be sorry to learn of this sad news.

Mining Progress—

A marked increase in mining activity is in evidence throughout Placed county. Some large properties have been turned recently, and negotiations are under way on others Other properties in the county are operating daily with small or large crews of men.

Your *inactive* dollars will PUT THEM BACK to WORK!

Slacker dollars cause much of the unemployment which now exists in California . . . Let's put all our worthy workers back on the job by *putting every idle dollar into immediate action!* . . Not for many years have we had such remarkable buying opportunities in every line. Why not take advantage of them *now?* . . Why not spend normally, stimulate all lines of industry and thus provide employment for all? . . Spend judiciously and *bank* your surplus. If every loyal Californian will do this NOW, unemployment will soon be a thing of the past . . . Do your bit for California's unemployed. Cooperate with industry and our time-tested banks. It is up to you —*and you, and* YOU, to bring back good times!

Lumber Talks...

CALIFORNIA

Our own state is the best one
Of all the mighty band,
From mountain tops in cloudland,
To old Pacific's strand.
Glory of golden poppies,
Wealth of her waving grain,
Oh, our state is the best one
In sunshine or in rain.

NEVADA CITY

Our city is the best one—
She reigns a beauteous queen;
Blue skies smile down upon her,
And clothed is she in green.
Wonder of old romances,
Linked with the days of gold—
But our vision scans the future
And the glories it doth unfold.
—A. M. C.

Our policy is to become interested in and work for the welfare of our community.

We are now stocking up with new lumber and building materials. Inquiries are coming in for roofing, both composition and cedar shingles. We carry a full line of both, and are in a position to cooperate with both the builder and contractor in laying either roof, composition or wood shingles.

It will be our policy to maintain prices consistent with the market. We cordially invite anyone interested in remodeling or new construction,, to our office for consultation, without obligation.

SMALL MINES OF AMADOR CO. SHOWING WELL

Small prospects in eastern Amador county show good rock and there is continued activity in the mining industry. The large producers remain active and priductive, but interest centers around the smaller mines, the prospect holes, the osd workings abandoned decades ago by miners who did not know the fine points of milling. Each week finds outside capital taking a keener interest in out mining world, and the trend is toward a revival of the industry.

Negotiations are under way for the sale of the Alta mine to the Messrs Green and Krimby of Angels Camp. The property is locatednear Volcano and is 350 feet deep and has been idle for several months. Le Payson is the owner. The buyers intend to erect a ten-stamp mill on the premises.

In the Pine Grove section new activities have commenced with the reopening of the Climax mine by the Climax Mining Company. Activities are being confined to the lower tunnel where the operators expect to uncover a four-foot vein. For the past 12 years the Climax has remained idle. During past operations the property ranked as one of the good producers of the Pine Grove district, and at present, the operators are confident that indications are excellent for mining activities on a larger scale.

The Galena King property in the same district has been bonded by Los Angeles people for $20,000 and will soon be started.

Near Valcano are a number of mines in operation. The property now being worked by Mr. Williams of San Francisco is showing promising indications. At the present time the shaft is 250 feet in depth and the company is engaged in drifting and in development work. This property was formerly a good producer, and the present operator has spent a large sum of money for equipment, installing up-to-date machinery.

Near the Williams property are the Kelsey brothers of San Jose, who are starting operations on a claim which has been abandoned for nearly 20 years. At present the Kelseys are engaged in erecting a compressor room and other necessary top workings. There is a 100-foot shaft at the mine, and from this have been taken several samples the assays of which show the presence of high grade ore.

W. H. Hall is just opening up the Old Dane mine, which is an extension of the Mitchell mine. This is another property that has been idle for nearly 50 years. Hall reports good ore values in sight. In the early days, according to the records, the Old Dane was a rich mine and gained considerable fame in that section as a producer. The property is a tunnel claim and is equipped with a two-stamp mill.

The Crammer claims have been opened up by Mr. Moon, who has discovered a five-foot ledge in the tunnel, the ore of which assays $15 a ton.

The Russel brothers have strated operations at the Old Stud Horse mine, located a short distance from the Volcano. This property is among the early day rich producers of the Volcano district.

In the Pioneer district the Moar brothers have bonded the Pioneer mine to Thomas Rosenburger of Los Angeles, who took over the property on Wednesday of last week. Operations will start at once. Preliminary work, preparatory to starting the mine, has been progressing for some time.

Progress is being displayed on mining properties near Pine Grove. The Three Horsemen, which has been operating for the past three weeks with Nick Contini in charge, is showing excellent results. Starting Monday of this week, Contini began milling operations at the Climax mill. He states that there is 60 tons of ore on hand which will keep the mill in operation for about one month. George Fuller and Matt Ryan, two Jackson boys, have the contract for hauling the ore from the mine to the mill.

Contini reports that the Three Horsemen property has reached a depth of 25 feet, and from assays made, the ore averages over $60 a ton and is free milling. At present, according to Contini, there is a seven-foot ledge, the extent of which has not been determined.

Contini is well pleased with the present outlook at the property, which is constantly showing signs of increased and more valuable production. The mill operations are being handled by V. S. Garbarini, Jr., of this city.

In the Pioneer district many small prospects are being operated and a number of the larger mines will soon be in active operation. Within a very short while activities will start at the Defender mine. Work of cleaning out the shaft at the La Duc mine has started and prospecting is being carried on at the Kimball claims. The South Extension mine has been bonded and the present promoters plan to start work shortly. Prospects are promising, too, for the reopening of the Carrie mine.

At the IXL mine the tunnel is being cleared and this work will be completed soon. Contini reports that in the work of clearing the tunnel he found some of the old timbers in excellent condition. Many of those timbers have been in the tunnel since 1891.

After a temporary shut-down ,the Galen Extension is to resume operations, with Joe Ruffino in charge. This mine is located on the old Stewart ranch near Pine Grove, and prior to being shut down, the mine showed some rich ore. Tmo shafts have been sunk on the porperty, one being domn 140 feet and the other being down 60 feet. Ruffino says that the ledge in the new 60 foot shaft is the same as that of the Petersen mine which adjoins his property.

Timbering operations have been in progress for the past three weeks in the 70 foot shaft of the Hardway mine. Bert Caldwell, who is in charge of operations at the mine, is being assisted by Fred Fisher and Dean Wiley. The ore in sight averages from $40 to $50 a ton.

CONG E NGLFBRIGHT HAS HAD VERY BUSY SESSION

The following report reached The Nugget too late to appear in the last issue:

Dear Mrs. Willoughby,

Knowing of your interest relative to the activities of Congress, affecting our Congressional District, I am herewith giving you an outline of some of the more important matters, and also of some of the larger appropriations and allocations I succeeded in obtaining in various bills at the session of Congress just closed.

MINING

At this session of Congress an effort was made to pass a law restricting the surface rights of mining locations, b yprohibiting the use of the claims for any other purpose than mining, unless permission was granted by the Secretary of Agriculture. Any violation of the Act was to be a misdemeanor punishable by a fine of not more than five hundred dollars, or imprisonment for not more than one year, or both such fine and imprisonment. The ocntemplated act also provided that if a mining claim was used for any purpose other than mining without the permit of the secretary of agriculture, the location became invalid, and the claim and improvements thereon reverted to the United States. It also provideu that any relocation of the claim by th eoriginal locator, or his agents, of all or any part of the area covered by the original location would be null and void.

I vigorously opposed this proposition and succeeded in blocking the measure from being brought up in either House of Representatives of the United States Senate. Should this bill have become a law it would have struck a serious blow to the future development of gold, copper and other metal mining industry of California, and the western states. It would have jeopardized and made possible the loss of many claims of prospectors, who, due to their limited financial resources, would have been unable to protect themselves in the courts. It also would have greatly hindered the future operation of many mining companies who desire1 to make large developments. Mining companies or individuals, such as the Engles or the Walker Copper Company in Plumas county, making developments at a distance from accomodations would have in the future been prevented from building restaurants, stores, cottages, boarding houses, or other facilities necessary to the operation of the mine, unless they were granted a permit from the secretary of agriculture. The secretary of agriculture might or might not agree as to the use of certain portions of mining claims, under such conditions for the said purpose. At the least, the proposed bill would have created a most annoying and complicated restriction on the mining industry, and perhaps have placed a cloud on the title of every mining location made in the future. Should this proposed bill be brought up at the next session of Congress, you may rest assured that I will again use every effort to prevent it from becoming a law. The gold mining industry needs every encouragement possible from both the fderal government and states and should not have further burdensome restrictions placed upon it.

SUSPENSION OF ASSESSMENT WORK ON MINING CLAIMS

On June 6, 1932, the Act of Congress, providing for the suspension of annual assessment work on mining claims for the fiscal year July 1, 1931 to July 1, 1932, became a law. Inasmuch as Section 2324 of the Revised Statutes of the United States provides that the period for doing annual assessment work begins and ends as of twelve o'clock noon July 1st, the question arose as to whether or not under the wording of the Act of June 6th, claim-jumping would be made possible from midnight June 30th to 12 o'clock ndon July 1st. In order to avoid any such possibility of claim-jumping, I succeeded in having an amendment made to the Act of June 6th, providing for the suspension of annual assessment work for the period twelve o'clock noon July 1, 1931 to twelve o'clock noon July 1, 1932. This preventeu any possibility of mining claims being jumped, and carried out the intent of Congress as to the period of suspending assessment work on mining claims..

MINING APPROPRIATIONS

oe-fbT onzh o Itbsepenty

For mineral mining investigation, concerning the mining treatment and economic development of the mineral industry, $135,000.00.

For examinations, investigations and dissemination of information concerning the economic problems oi the mining and mineral industry, $250,000.

For printing geologic reports and maps, $250,000.

It was from the appropriation that I obtained for this same purpose at the last session of Congress that made possible the publication of the new bulletin on the Mother Lode system of California, and which is a report and study of the mines of the Mother Lode belt, from Georgetown in El Dorado county to Mariposa in Mariposa county. From this appropriation, I also secured the publication of the new Professional Paper No. 172, which is a report on the Gold Quartz Veins of the Alleghany district in Sierra county. The publication of these two new geological survey reports, the "Mother Lode System of California", and the "Gold Quartz Veins of the Alleghany District, of California," is in wide demand, and should prove of great value to the gold mining industry of the state.

My bill to exempt from federal income taxation, incomes derived from the mining of gold is bfeore the Ways and Means Committee of the House and has much valuable support.

Along with others in the House of Representatives and the Senate, we succeeded in getting a provision in th new Revenue Act, providing for a tax of four cents a pound on the copper contained in imported ores. This provision was obtained for the purpose of preventing large amounts of copper ore from being imported into the United States, so as to make possible the reopening of the copper mines of California and other states.

ROAD APPROPRIATIONS

For the construction of roads and highways in the national forests in our congressional district, $825,000.

FOREST FIRE PREVENTION

Using as a basis the hearing held on my Forest Fire Prevention Bill, there was placed in the Emergency Relief Bill, an appropriation of $5,000,000. for forest fire prevention, roads and trails, of which California will receive a large amount.

LIVE STOCK INDUSTRY

Eearly in the session of Congress, I took up with the U. S. Forest Service and the U. S. Department of Agriculture, the necessity for granting a fifty percent reduction in grazing fees to stock men. I succeeded in this endeavor and on February 24, 1932, an order was issued giving a reduction of fifty per cent of all grazing fees for the year 1932. This order applied to an grazing fees in all of the national forests, and has been of great assistance to the livestock men.

NATIONAL PARKS

For the development and improvement of Yosemite and the Lassen Volcanic National Parks, $973,500.

For fire prevention measures and tree diseases in National Parks, $190,000.

RECLAMATION APPROPRIATION

For the Tulelake Reclamation Project, $160,000,000.

STREAM GAUGING

For cooperative stream gauging, $50,000.

FORT BIDWELL INDIAN HOSPITAL

For the Fort Bidwell Indian hospital, $15,000.

VETERANS

During the session of Congress just closed, I handled and provided for many pension and compensation cases and other matters of importance to the district. I supported the amendment to the World War Adjusted Compensation Act, reducing the interest rate on loans on Adjusted Service Certificates and making the loan privilege on Adjusted Service Certificates available immediately after issuance. There are two features in this bill; the first feature is that of the elimination of the two-year provision of the World War Adjusted Compensation Act of May 19, 1924, thereby making the loan privilege on Adjusted Service Certificates available immediately after issuance. The second feature of the bill reduces the rate of interest charged on loans made on Adjusted Service Certificates from 4½% to 3½%. Many veterans throughout the district will receive benefit from this act.

The foregoing subjects are, of course, in addition to the many regular and administrative appropriations and other legislation that I have secured for the various federal activities and projects and matters of importance to the Second Congressional District of California.

I supported and assisted in passing the Reconstruction Finance Corporation Act, the Home Loan Bank Law, the Emergency Relief Act, and all other measures that had for their purpose the relief of unemployment, the stimulation and recovery of agriculture, business and industry, and for the stabilization of the financial structure of the Federal Government.

Since the close of Congress, I remained in Washington for the purpose of arranging for such additional appropriations for federal construction work in the Second Congressional district as may be obtained under the provisions of the Emergency Relief Act, and have returned to California to make a tour of my district as soon as possible.

Sincerely yours,
Harry L. Englebright,
MC 2nd District of California.

PROSPECTING GOUGE EYE

H. Stewart and F. A. Moulton are prospecting in the old Gouge Eye at Centreville, near Foresthill, and across from the famous Hidden Treasure, which ha sa record of production running to many millions. The men have entered the channel and are developing.

REAL ESTATE TRANSFERS

The following are the real estate transfers for the past week:

Mary Martens to John J. Schmidt and Lois Cunningham—Property on highway near Town Talk.

Edward W. Weeks to ClaraPhelan—land in Section 36, Township 16, North Range, 7 East, southwest of Grass Valley.

Thomas R. Edwards et al, to William Rogers—Lot 4, Block 45, South Grass Valley townsite; Elmer Durbin to Florence Dhalgren—Portion of Lot 7, Block 9, on Main Street Nevada City.

Lorenzo Pianezzi to Angiolina Pratti—portion of Lot 8, Block 53, Nevada City on Clark Street.

Joanna Reardon et al to Arthur T. O'Connor—Land at Birchville.

John Beitchen to Rose Kneebone—Lot 13 in Clinch Subdivision, south of Grass Valley.

LONE PINE MINE BUSY

The geological survey of the National Silver Corporation's new gold strike near Lone Pine, California, is reported completed and a crew has started building a road from the Saline valley to the discovery.

This will be followed by a series of excavations in Hunter canyon for the installation of jig-back tramway to transport the ore from upper wrokings to the base of the mountain where a 250-ton ball-type mill will be erected, according to John D. Fields, who heads the company.

Surface prospecting has uncovered the gold vein for 1000 feet and where first it is reported to be 30 feet wide. The surface ore is oxidized quartz carry free gold, changing to iron sulphide where exposed at depth.

At the Four Hills mine, located in northern Sierra county, 15 stamps are being used on good ore. With a crew of six men a raise is being put up from the Mexican tunnel. The work has progressed 300 feet toward the ledge and good rock is now being encountered. A five-foot ledge will be stoped out to the surface. Andrew Bachels of Goodyear Bar is the operator of the mine.

U S TO SPEND LARGE SUM IN NATIONAL FOREST

Under the terms of the emergency relief and regular appropriation bills passed by the last Congress, $3,584,615 will be spent this fiscal year in the national forests of California for the construction and improvement of forest highways, roads, trails, bridges and fire prevention projects, according to report of S. B. Show, chief of the California Region, United States Forest Service. This is the largest sum ever received in one year by the Forest Service for road work and improvement work, and will furnish employment for large numbers of men.

Of the total Federal allotment to the national forests of California, $1,458,566 comes from the Emergency Relief Bill signed by President Hoover on July 21, which contained a $10,000,000 item to be expended in national forests throughout the country for unemployment relief. The balance , $2,126,049, is a part of the regular Department of Agriculture appropriation for road and trail construction and protection improvements in the national forests.

Major roads of the national forests are part of the state highway system and will receive $2,347,672, and an additional $1,236,943 will be spent on minor forest roads, trails, firebreaks and other protection improvements.

Mr. Show stated they plan to continue cooperation with the California Unemployment commission in the establishment of labor camps in or near national forests as was done last winter.

It has been suggested that Nevada and Sierra counties should be alert in applying for large sums for Federal road building. The Tahoe Ukiah highway has been under construction for many years and today the utility of the road is largely nullified for the lack of completion of a very few miles of mountain highway.

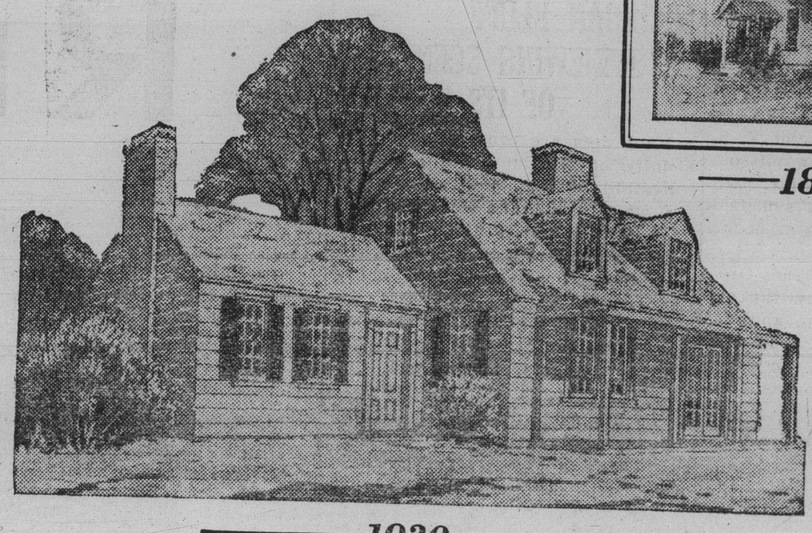
MIRACLE . . . ?

. . . . . Not At All

1899



1930

. . . Just an Idea and a Few Building Materials

There is nothing particularly unusual about the transformation of this drab, uninteresting, run-of-the-street house into a charming, liveable, and altogether attractive colonial cottage.

Just the desire for a little better . . . truer . . . architectural type, more modern conveniences, and greater comfort. These, plus a few thousand board feet of lumber, did this job.

If you are not entirely satisfied with *your home* . . . if you need more room, if the exterior appearance worries you . . . you'll be amazed at the ease with which it can be trimmed, added to or revised into the equivalent of a brand new home planned by yourself. *You'll be surprised at the low cost, too.*

Let us show you how a modernization as marked as the one pictured above can be wrought in your home. There will be no obligation for our suggestions . . . we'll gladly estimate the cost.

MUCH MINING ACTIVITY IN TRINITY CO.

WEAVERVILLE (Trinity Co.)—There is more activity in this district among miners than for many years, although many of the hydraulic operations are shut down for lack of water, or are about to shut down, and several placer operations are temporarily suspended in obedience to the debri slaw affecting the Klamath river. There are, it is estimated, some 500 men panning the river beds and creeks in this district, and perhaps 200 men employed by the larger concerns. This is essentially a placer district.

On the edge of town A. C. Macmillan (Trinity Exploration Co.) is experimenting with a shovel outfit, which is just being completed. If this machine is successful, others will be built and used extensively here, as well as in other districts of the state. The shovel dumps into a hopper on the machine, and the dirt and gravel is fed into the center of two revolving screens. Water under high pressure is sprayed against the inside of the inside screens, breaking up and washing the material thoroughly . Boulders and debris are carried out the side by a delivery belt, the sands and gold going into a 50-foot sluice, where the gold is recovered. The machine is small enough to be moved by the shovel, and will take care of some 700 yards daily, or more, according to the ground. Three men can operate it. Many mining men from all parts of the west have inspected the machine the past week.

The Trinity Dredging Co. is operating a regular dredge at Lewiston and the Chenoweth dredge is soon to start, it is said. Lee Nafszgar is working a shovel outfit at French Bar.

United Placers, Ltd., operating on Canyon Creek, have made two very successful clean-ups on their placer claims. If this company is successful in obtaining the amount of water desired, being negotiated for, it will employ many men.

E. E. Frick, superintendent of the Brown Bear, is employing some 20 men, it is said, in development work. This is a quartz property, and has produced several millions in gold in the past. Under the present able management, it will probably again become a steady producer.

On Eastman Gulch the Palace of the Oaks, a quartz property, is being developed by J. R. Blair and V. S. McClellan, with a promising outlook.

The Enterprize quartz mine, near here, is taking out ore in sufficient quantities to pay expenses of development, it is said.

Some people from Portland, Ore., have worked the dump on the old Shasta-Trinity, cleaned up, and departed for parts unknown, it is said, leaving local men looking for wages due. However, this mine has good prospects, if handled properly.

There are a number of deals pending on proven mine properties from which it iis certain there will be more activity in the near future. This section has produced many millions of dollars in gold. The quality of the metal in this district compares favorably with Alaskan gold, bringing around $19.

A mining deal is reported near Trinity Center. A. G. Hunter and Dora Taylor have turned over half of the interest they owned in various mining properties, four miles from Trinity Center, to J. M. Heady and P. G. Heady, who represent Richmond and San Francisco capital. S. Williamson represented the Headys in the transatcion.

Hunter and Williamson plan to erect buildings on the properties and expect to put on men soon. The company will install hoisting machinery where it did hydraulicicking last spring. Hunter has for some time been running tunnels and sinking shafts on the property.

Channels deeper than the creek make it necessary to work on a larger scale, but it will be some time before more men are employed.

SEARCY DEVELOPING CLAIM

Walter Searcy, owner of Gasoline Alley in Auburn, has been doing considerable prospecting work on a ledge of quartz that he struck on his property recently while digging for a well to irrigate the upper portion of his property. The ledge in some portions bore considerable gold and he thinks there is a good opportunity to develop the vein.

He has two pumps taking care of the water and is going down further than he originally intended to do. At present he has struck a side wall of pyrite that may bring in some paying goid. He is down approximately 30 feet and has timbered the shaft as he went down.

The Rock Creek district (placer county) may yet develop some paying mines, according to those who know the country.

NEW FIND BELOW OLD PIUTE WORKING LEVEL

W. J. Quackenbush, manager of the Piute Mining Company, a Seattle-financed organization, operating at the head of Kelso creek, one and one-half miles from the St. John mine, brought down the news of their bringing in a 5-foot vein at a depth of 148 feet, recently.

The new find is below all of the old workings made in the old days by the Moore family, who have owned and held the property since the early sixties.

The large chunk of ore is a dead ringer for the Keyes mine ore, the same white iron, the telluride showings and free gold visible to the naked eye. The bottom of the shaft is all ore. Assays will be made at Los Angeles; pannings show free gold similar to the Keyes pannings made on a visit to the Keyes mine last spring. It is believed that the ore will break better than $100 to the ton.

ALPINE COUNTY MILL WORKING

Grant Marsh of the Colusa Mining Company in Alpine county recently reported that the new mill is being tuned up and will soon be ready for capacity operation. Minor adjustments are being made during the crushing of small tonnage of ore and thus far the results have been most encouraging.

A new body of ore has been encountered in the mine and while assays have not been made, it is believed to be the richest ore yet encountered, which gives promise of developing into a great deposit of exceptionally fine milling rock.

SUBLEASE WEST. EXTENSION

M. L. Mitchell of Nevada City, who has been developing the Western Extension, just west of the North Star mine at Grass Valley, has subleased the property to a Mr. Hill, mining engineer of Jackson, who is working the tailing of the famous Argonaut at that place, Mr. Everett and Mr. Beckley of Gold Hill, and Mr. Carpenter of Nevada City. Mr. Hill thinks highly of the property, which produced years ago. The men are reopening an old shaft, which has not been worked since 1924.

MICHIGAN BLUFF RENEWING SCENE OF ITS HISTORY

Many men are prospecting in the vicinity of Michigan Bluff, on the Foresthill divide, once supporting 500 white people and some 400 Chinese, and several of the old mines, once dividend payers, are being reopened and prospected, both quartz and gravel.

Bert H. Rogers, Kansas newspaper man and father of the famous "Buddy" Rogers, has turned gold miner and, with a crew of three men, is opening up the old Golden Sheaf quartz mine just below Michigan Bluff, with a fair chance of uncovering ore. The tunnel has been driven some 900 feet.

Bob Summers is opening a prospect above town and hauling the ore to the Daniel Webster, where he is using the mill. So far his work is largely on the surface, and yet the rock shows fair values.

Otto Morgan and Mr. Oliver are prospecting in the old Turkey Hill, which has a record of $200,000 in a short time before it was abandoned. This property is just north of Michigan Bluff.

ELECTRO AMALGAMATOR RECOVERS GOLD VALUES

For the past 18 months, H. J. Jackson and associates at Barstow, San Bernardino county, have been working on a device to recover gold from their property at Bristol Lake. This property is located south of Bagdad.

To date there has been tried 16 diffierent devices to separate the gold ore and it was not until the past few weeks that an electro amalgamating device was perfected which would separate the gold from the other minerals found. About $18,000 has been spent so far, according to Mr. Jackson, in developing this property and inventing the amalgamating device to handle this ore. The company tried an electro plating system but it failed to save the values.

The company has 3200 acres and has tested their ground by drilling nine holes scattered about the property. The holes are eight inches and drilled to a depth of 60 feet. They have shipped 16 tons to their testing plant in Los Angeles. The lowest recovery reported by Mr. Jackson was $1.40 in gold and the highest was $298 and eight ounces of quicksilver.

Drag lines will be used to bring the ore into the plant.

YUBA RIVER CANYON COUNTRY

The steep road to Alleghany, after leaving Foote's Crossing, follows the canyon of Kanaka Creek in a more or less crazy fashion. Along the ridge and off in the distance across the canyon toward the high Sierra's are visible the yellow scar of the hydraulic mines, where once flourished the mining camp of Moores Flat. Just beyond are the high peaks of the Sierra Nevada divide.

The road now drops away steeply to cross one of the many small streams which flow toward Kanaka Creek after which it proceeds to climb once more. This process is repeated numerous times during which the stage station is passed where in winter changes are made from automotive equipment to horese and sleds; past heavy deposits of shining green serpentine rock; past glory holes, where many years ago gold seekers dug down in the hope of finding gold veins; past deserted mines that can bee seen far up the ravines; and past properties such as the Madden mine which Ambrose Madden, an elderly man who spends his winters in a San Francisco hotel and his summers at his mine, some day hopes to sell for the price that he feels he should get.

The road now follows close along the bottom of the canyon but soon it begins to climb once more on its final ascent to Alleghany. It is here the country becomes rock bound as the road climbs and glimpses are had of many gold mines down below—the Rainbow, the Oriental. We have now commenced to penetrate well into what is acknowledged the most fascinating gold mining territory in the United States, the world famous Alleghany district. Here are mines by the dozen that produced from fifteen to twenty thousand dollars for the small ones to many millions out of the more successful ones. The character of the district is such that gold is found in pockets Authentic reports show where one shoot has produced within a few thousand of one million dollars; where one chunk of ore weighting 163 pounds has brought $27,000 from the mint; where thousands of feet of work has been done along the vein and in raises that has produced a return of as much as $235 a foot for the entire distance. Here a mine has produced $80,000 in one pocket, has had the tunnel caved and like the Spanish galleon loaded with gold has been lost. Even like the sunken treasure these mines have been searched for, tunnels have been driven in various places in various directions but in vain. The old workings, due to faulty surveys, were never again located. It is therefore the motorist finds himself in a region where every gold mine and every tunnel is surrounded with a fascinating mystery. For who knows but that history will repeat and that a property once given up as being mined out may fall into the hands ow those who will drive it further and in a comparatively few years be rewarded with dividends running into millions.

Another short mile and we pass a most unique baseball diamond, somewhat short in area, the entire field on a hillside of about 15 per cent grade. It was the only available spot for the great American game and the people of Alleghany were thankful to have it.

BUELL FINDS RICH ORE IN THE PARAGON

FOREST HILL (Placer Co.)—George Buell ,of Sacramento, who is doing extensive prospecting work on the old Paragon quartz claims, recently uncovered two very rich ledges while crosscutting from a tunnel to an old shaft. One vein was found just after the cut was begun and the other was tapped while the old shaft was being extended down. This property is a few miles below Foresthill and was discovered and worked by Breese and Wheeler some 75 years ago. Later the property was sold to Tom Brown, who worked it for a while, and since has passed through a succession of owners until Buell took it over last September.

Buell is planning not to touch these ledges until he has further prospected the mine. A crew of seven men have been rebuilding the old Hendy two-stamp mill, and considerable new machinery, including an air compressor, has been installeu. If the proposition warrants, which it undoubtedly will, the mill will be enlarged later.

Mr. and Mrs. Buell are living near the property, which is in the old Bath mining district. Some beautiful specimens, white quartz with leaf gold and stringers, have been taken from the new ledges.

SUBSCRIBE FOR THE NUGGET

GEOLOGICAL REPORT ON ALLEGHANY ISSUED

The Alleghany district, in the southern part of Sierra county, has been a producer of gold since the earliest days of gold mining in the state. The district differs from other gold-quartz districts in California in that nearly all the production, which has probably exceeded $20,000,000 from the lode mines only, has been derived from small shoots of very high grade ore.

The veins occur in metamorphic rocks that are intruded by serpentine, gabbro, and granite. A large part of the area is covered by andesitic breccia that is later than the veins. Below the breccia in places orcur old stream channels, which carry auriferous gravel deposits that were formerly mined for placer gold. The veins in general follow two systems of fissures, both of which have northerly strikes. In one system, which has yielded the greater production, the veins dip gently to the east. The veins of the other system dip steeply to the west.

several other minerals, of which arsenopyrite, pyrite, and other sulphides and feldspar, carbonate, sericite, and mariposite are the most abundant. The gold was introduced comparatively late in the process of mineralization, distinctly later than the quartz and contemporaneously with the carbonate, sericite and mariposite.

The peculiar concentration of gold in the high-grade shoots was one of the principal objects of a study of the Alleghany district by H. G. Ferguson and R. W. Gannett .

LEGAL NOTICE

NOTICE OF TRUSTEES' SALE UNDER DEED OF TRUST

WHEREAS, Amanda J. Rapp, on August 21, 1915, executed and delivered her certain Deed of Trust to F. D. Philips and George K. Rogers, as trustees, for the benefit and security of the California Prudential Society, a corporation, to secure the payment of a promissory note in the sum of $800.00, with interest thereon, which said Deed of Trust was recorded, in the office of the county recorder of the County of Nevada, State of California, Volume 1 of Trust Deeds, at page 449, et seq. Nevada County Records; and,

WHEREAS, the said promissory note, together with interest thereon, for value received, thereafter and before due, to wit, December 1st, 1915, was duly assigned by said beneficiary thereof to the Union Home Builders, a Trust Estate, together with all their rights, title and interest in and to the said Deed of Trust, securing said promissory note; and,

WHEREAS, the said promissory note, together with interest thereon, for value received, thereafter and before due, was duly assigned by said Union Home Builders, a Trust Estate, to the Merger Securities, Inc., a Delaware Corporation, together with all its rights, title and interest in and to the said Deed of Trust, securing said promissory note; and,

WHEREAS, the said Merger Securities, Inc., as assignee beneficiary under said Deed of Trust, on October 5, 1931, recorded a Notice of Default and Breach and Election to Sell, under said Deed of Trust, in Book 12 of Official Records, page 93 et seq., thereof, of Records of Nevada County, State of California; and,

WHEREAS, the said Merger Securities, Inc., pursuant to said Notice of Default and Breach of Election to Sell, under said Deed of Trust, as the owner and holder of said promissory note, secured by said Deed of Trust, after repeated demands for payment of said note and interest thereon, has elected to sell the real estate in said Deed of Trust described, to satisfy said indebtedness; said real estate is more particularly described as follows, to wit:

All that portion of Lot No. Four (4), in Block No. Fifty-two (52), of the City of Nevada, as said lot and block are designated upon the Official Map of said City of Nevada, made by H. S. Bradley, in the year 1869, described as follows, viz:

Commencing at a point on the westerly line of Sacramento Street, 93 feet northeasterly from the northeasterly corner of Lot No. 5, in said Block No. 52, (said Lot No. 5 in Block No. 52, formerly owned by J. D. Fleming); thence northwesterly at right angles to the westerly line of Sacramento Street, to the center of Deer Creek; thence northeasterly along the center of Deer Creek a distance of 45 feet; thence southeasterly to a point on the westerly line of Sacramento Street 45 feet northeasterly of the place of beginning; thence southwesterly along the westerly line of Sacramento Street, 45 feet to the place of beginning, all in Nevada County, State of California; and the said Merger Securities, Inc., a corporation, does hereby give notice that on Tuesday, the 16th day of August, 1932, at the hour of 10:30 o'clock A.M. of said day, at the Front Door of the Court House, in the City of Nevada, County of Nevada, State of California, it will sell, at Public Auction, to the highest bidder, for cash, in hand, in lawful money of the United States of America, all that certain real property hereinbefore last described.

TERMS OF SALE, cash in hand at drop of hammer; and the said owner and holder of said note, or any person ,may purchase at said sale.

Dated July 18, 1932.

MERGER SECURITIES, Inc.,
By RODOLPH HATFIELD,
Attorney.

First Publication July 22, 1932.
Last Publication August 12, 1932.

NOTICE TO CONTRACTORS

Bids will be received for immediate completion of approximately 130 feet of 5 by 9 raise to connect Tunnels No. 2 and 3 at the Twin Sisters Quartz Mine at Snow Point. Raise now up 200 feet at an average dip of 60 degrees.

Contractor to supply board and bedding at $1.00 per day; to furnish powder, caps and fuse, to timber raise and chute.

Company to supply power, tools and equipment as well as timber and to sell powder, fuse and caps at cost, although Contractor may submit a separate bid covering powder, fuse and caps if he so desires. Electric blasting equipment furnished.

Bids to be submitted on a lineal foot basis. Work to be completed within 40 days of the signing of contract.

Company retains right to reject any and all bids.

For information concerning underground conditions see Edw. C. Uren. Bids will be opened August 10th and should be submitted immediately to the secretary.

C. L. WHITE,
17 Harcourt Street,
San Rafael, Calif.

MISSING PEOPLE SOUGHT

An inquiry has been sent to The Nugget requesting that we call attention to a search being made for James and Johanna Nolan, who lived in this vicinity years ago.

According to information they had a daughter named Margaret born about 1857, as well as other children named Mary, Kate and Lena. Possibly some of their descendents are readers of your paper, in which event it will be to their interest to get in touch with us at once, giving full particulars of the family history Likewise, any friends of the family having information as to where relatives might be found will be doing a favor to all concerned by sending us whatever data they can.

An estate valued at $3,000 is involved.

NOTICE OF ELECTION

Notice of the time and place of holding the August primary election, List of Offices for which candidates are to be nominated or elected. List of all election precincts and their respective polling places and the names of the election officers who are to serve in said precincts.

Notice is hereby given that a Primary Election will be held throughout the State of California on Tuesday, August 30th, 1932, at which election candidates for the following Congressional, Legislative, Judicial and County offices will be voted on.

NEVADA COUNTY
is entitled to representation in the District Court of Appeal,
Therefore . . . ELECT
Judge John F.
PULLEN
Presiding Justice

ELECTION AUGUST 30th

Sacramento Valley and Mountain Counties are now without representation in this extremely important Court. Your vote for Judge Pullen will correct this situation.

Judge Pullen's thorough knowledge of Water Rights and other Problems of this District . . . his Record of Meritorious Service in Public Life . . . his widely recognized ability . and his unswerving devotion to Duty make him the logical choice for Presiding Justice.

PERSONAL MENTION

Mrs. Ella M. Austin, county superintendent of schools, received word Wednesday night of the death of Charles Frances, who passed away at Cort Madera. He was a former resident of Spenceville for about six years, later moving to Loomis where he was post master for a time and later purchased a farm near that city which he had been operating up until his last illness. Mrs. Austin will attend the funeral which is to be held in Roseville this afternoon.

Mr. and Mrs. Herman Katzer came up from Auburn this week for a visit with her parents, Mr. and Mrs. Thos. Oliver. Mr. Katzer is planning on opening a variety store in Gridley in the near future. He and his wife have been in charge of the Sprause-Reitz store in Auburn.

Mr. and Mrs. Horace Curnow and two daughters, Mrs. Curnow's mother, Mrs. J. A. Bennetts of Grass Valley, and her sister and brother-in-law, Mr. and Mrs. Ray Croft and family of Australia, are in Santa Cruz for a two week's vacation.

Mrs. Earl Covey, who has been very ill in Jones Memorial hospital with influenza for the past week, returned to her home Wednesday. She is still quite weak but we hope for her an early recovery.

J. H. Moynough, luckily escaped without serious injury, when his car left the Auburn highway at the Twitchell place and plunged down an embankment and through a fence. The car was brought to Nevada City for repairs.

Cars thronged the streets for blocks Wednesday night as the people attended the Nevada City theatre to see the Schmelling-Sharkey prize fight in the talkies, and also the play, "Carnival Boat."

Mr. and Mrs. Arthur Dolan and two daughters left for their home in San Francisco Sunday after a few day's visit with his brother, James Dolan and wife of this city..

Mrs. Ella M. Austin, county superintendent of schools, returned Sunday evening from a few day's visit in San Francisco with her son, Bert Austin, and wife.

Mr. and Mrs. Henry Jacobs and children are spending their vacation in Alleghany with Mrs. Jacobs parents.

James S. Graham of San Francisco attended the funeral of his late sister, Miss Helen Graham, which was held Tuesday.

Will Jeffrey and son, Will, Jr., are spending a week's vacation in San Francisco.

Mr. and Mrs. Fred Beedle of Reno attended the funeral of his late sister, Miss Sadie Beedle, which was held last Monday.

Herbert Cooper, division manager of the P. G. & E. Co., was a business visitor in Nevada City Wednesday.

Mr. and Mrs. Ben Hall have had as visitors their son, Robin, and wife of Oakland.

W. P. Clerkin of French Corral was a visitor in Nevada City Saturday.

A. P. McCarton, who operated the Rome power house of the old Bay County Power Company, for a year and a half, 30 years ago, was in Nevada City Tuesday enroute to Plumas county to visit a friend. Mr. McCarton stayed with Mrs. Hathaway, a former teacher, while in Nevada City. He became real well acquainted while here in the year and a half, and recalled a number of people of this city, last Tuesday. Mr McCarton said in this trip he marveled at the steep and narrow streets of Nevada City.

Mrs. Ida Spellenberg, her son, Homer, and Mrs. Rimby, all of Arcata returned home Tuesday after a few day's visit in Nevada City with Mrs. Spellenberg's brother, Dick Fisher Mr. Fisher accompanied them home for a visit in that section.

Margaret Hammond, oldest daughter of Mr. and Mrs. Art Hammond of Park avenue, had her arm thrown out of place a few days ago and suffered much pain until it was set in position.

Will Runyon of San Marino flew to Sacramento by airplane and was met there by his niece and husband, Mr. and Mrs. Will Davey, who motored down from Nevada City to meet him. He will spend a two weeks vacation with them.

SPEED HIWAY WORK

The people of Sierra county are asking the people of Nevada county to help them keep the road work going on the highway south of Downieville.

Unless drastic steps are taken, work on the Yuba Pass highway below Downieville may be discontinued indefinitely, to the great detriment of the best interest of this and adjoining counties. Only a few men now remain on the job, which is to be completely abandoned within possibly a week. To leave this job in an unfinished and unsatisfactory condition for an indefinite period is unthinkable. The attention of Governor Rolph and his administration must be called to this situation immediately. Do your part by cutting out the following open letter to the Governor and mailing it right away to "Governor Rolph, Sacramento, California."

To His Excellency,
James Rolph, Jr.,
Governor of All the People of the State of California,
Greetings:

It is rumored that, within a very short time, work on the State Highway between Indian Valley and Goodyears Bar in Sierra County will be discontinued.

This is a request that you, as Governon of the whole State, see that this work goes on. Much money has been spent on this project and if work is now suspended, the benefit will be lost, men will be thrown out of employment, and wives and children will suffer by reason thereof.

California"s share of the Federal funds for road building is $4,000,000. Cannot Sierra County have enough for her share to carry on until more State funds become available.

I ask you, in the name of humanity, and as a voter, use your position to help this county in this time of economic stress and unemployment that no more sufferers be added to the unemployed millions.

Name.....
Address.....

L. A. Smith, who has been operating the River Placers, Ltd., on the Middle Yuba river near the Delhi mine, passed through town Sunday enroute to the property.

Miss Beedle Passes—

Funeral services were held for Miss Sadie M. Beedle Monday morning. Rev. George C. King conducted the services and interment was made in Pine Grove cemetery. The following were pall bearers, J. Stenger, J. Snell. A. Hooper, and S. Mitchell. The many beautiful flowers gave mute testimony of the love and esteem held for Miss Beedle.

Let Golden Rule Pay for your Vacation

Be one of the fortunate, use skill and wisdom. Find the riches it spells. Stake your big stake now and be independent when winter comes. Thousands are now combing the hills and reports of many rich finds have been recently made in various parts of the gold country. These were mostly "lady luck" finds after much hardship. Don't go out half cocked, spend $1.50 or $3.00 extra on your kit by adding the Guggenheim Gold Detector and add more wisdom than luck to your finds. These are indestructible, scient fic instruments with which you may without any knowledge of your field, find plenty of placer gold and silver and rich placer pockets that often contain fortunes. No prospecter should start on a trip without them. Price $1.50, professional size $3.00. Send money order or cash. If you are dissatisfied with them inside of 10 days, send them back and we will refund your money.

PUT A SMILE ON THE FACE OF THE DAY

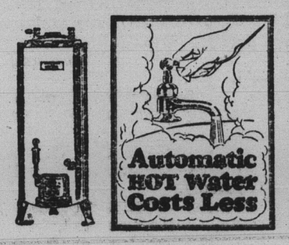
Automatic HOT WATER

Days that start pleasantly too often turn sour because of such simple things as half-warm water or inadequate supply for a singing shower or a speedy shave. Then, too, if hot water is not automatically available for each of the 150 daily uses, the frown of worry or the extra burden of work is bound to spoil a woman's day.

There is always one best way of being certain. For carefree certainty of hot water the one best way, and most economical, too, is to have the service of an *Automatic Hot Water Heater*.

It keeps a dependable supply of hot water stored within a thickly insulated tank that is part of the heater itself. A thermostat turns the gas burner on to heat more water and keeps the supply at full capacity.

An *Automatic Hot Water Heater* is not costly to buy and is economical to operate. Bills of thousands of users show an *Automatic* to be the lowest cost method of heating water in the home.



Your local dealer will replace your old-fashioned water heater or waterback at low cost or you can consult your local P. G. and E. office regarding trade-in allowance.
